Wander through the SERENE FOREST overlooking the SILVER LAKE to find the SACRED GROVE.

The secluded chapel and gathering space are situated on a cliff in a naturalized forest. Trees and sunscreens modulate light as it enters the building. Shade and shadow continually dance across the natural wood interior creating a peaceful and meditative space.

The entry is enclosed to create a transition and pause between the interior and the park outside. Columns have become trees supporting the roof, which is split to allow controlled light into the chapel. Dappled sunlight transforms the space anew each hour and season.
